I tried to install another version of mastercam with 64bit version, but the problem still remains. I asked many times but there is no answer. Mastercam is an error but it is the only software that can generate 64bit files for mastercam. Everytime I try to load a 64bit solidworks file, it tells me to save it in file.cab format. I've tried downloading the 32bit versions of mastercam, but I keep getting the same error. Am I missing something, or is it just a huge pain to get mastercam installed?
